

熱物性計測に関する論文

《周期加熱カロリメトリーに関する論文》

1. T. Tsukada, H. Fukuyama, H. Kobatake
“Determination of Thermal Conductivity and Emissivity of Electromagnetically Levitated High-Temperature Droplet based on the Periodic Laser-Heating Method: Theory”
Int. J. Heat Mass Trans., 50, p.3054-3061, (2007).
2. H. Kobatake, H. Fukuyama, I. Minato, T. Tsukada, S. Awaji
“Noncontact Measurement of Thermal Conductivity of Liquid Silicon in a Static Magnetic Field”
Appl. Phys. Lett., 90, p. 094102-1-3, (2007).
3. H. Fukuyama, H. Kobatake, K. Takahashi, I. Minato, T. Tsukada, S. Awaji
“Development of Modulated Laser Calorimetry using Solid Platinum Sphere as a Reference”
Meas. Sci. Technol. 18, p.2059-2066, (2007).
4. H. Kobatake, H. Fukuyama, I. Minato, T. Tsukada, S. Awaji
“Noncontact modulated laser calorimetry of liquid silicon in a static magnetic field”
J. Appl. Phys., 104, p.054901-1-8, (2008).
5. T. Tsukada, K. Sugioka, T. Tsutsumino, H. Fukuyama, H. Kobatake
“Effect of static magnetic field on a thermal conductivity measurement of a molten droplet using an electromagnetic levitation technique”
Int. J. Heat Mass Transfer, 52, p.5152-5157, (2009).
6. H. Fukuyama, K. Takahashi, S. Sakashita, H. Kobatake, T. Tsukada, S. Awaji
“Noncontact modulated laser calorimetry for liquid austenitic stainless steel in dc magnetic field”
ISIJ International, 49, 9, p.1436-1442, (2009).
7. H. Kobatake, H. Fukuyama, T. Tsukada, S. Awaji
“Noncontact modulated laser calorimetry in a dc magnetic field for stable and supercooled liquid silicon”
Meas. Sci. Technol. 21, p. 025901-1-9, (2010).
8. K. Sugioka, T. Tsukada, H. Fukuyama, H. Kobatake, S. Awaji
“Effect of static magnetic field on thermal conductivity measurement of a molten Si droplet by an EML technique: Comparison between numerical and experimental results”
International Journal of Heat and Mass Transfer, 53, p.4228-4232, (2010).
9. 杉江一寿, 小島秀和, 福山博之, 馬場雄也, 杉岡健一, 塚田隆夫
「非接触レーザー周期加熱カロリメトリー法による溶融 Fe の熱物性計測法の開発」
鉄と鋼, 96, 12, (2010).
10. Y. Baba, K. Sugioka, M. Kubo, T. Tsukada, K. Sugie, H. Kobatake, H. Fukuyama
“Relationship between applied static magnetic field strength and thermal conductivity values of molten materials measured using the EML technique”
Journal of Chemical Engineering of Japan, 44, 5, p.321-327, (2011).
11. K. Sugie, H. Kobatake, M. Uchikoshi, M. Isshiki, K. Sugioka, T. Tsukada, H. Fukuyama
“Noncontact Laser Modulation Calorimetry for High-Purity Liquid Iron”
Jpn. J. Appl. Phys., 50, p.11RD04-1-6, (2011).
12. Y. Baba, T. Inoue, K. Sugioka, H. Kobatake, H. Fukuyama, M. Kubo, T. Tsukada
“Thermal conductivity measurement of molten copper using an electromagnetic levitator superimposed with a static magnetic field”
Meas. Sci. Technol., 23, p.045103, (2012).

《表面張力測定に関する論文》

1. S. Ozawa, N. Takenaga, T.Koda, T. Hibiya, H. Kobatake, H. Fukuyama, M.Adachi, M. Watanabe, S. Awaji
“Oscillation Behavior of High Temperature Silicon Droplet by the Electromagnetic levitation Superimposed with Static Magnetic Field”
Materials Science and Engineering A, 495, p.50-53, (2008).
2. S. Ozawa, K. Morohoshi, T. Hibiya, H. Fukuyama
“Influence of oxygen partial pressure on surface tension of molten silver”
J. Appl. Phys., 107, p.014910-1-7, (2010).
3. S. Ozawa, S. Suzuki, T. Hibiya, H. Fukuyama
“Influence of oxygen partial pressure on surface tension and its temperature coefficient of molten iron”
J. Appl. Phys., 109, p.014902-1-5, (2011).
4. 諸星圭祐, 小澤俊平, 小島秀和, 福山博之, 日比谷孟俊
「電磁浮遊液滴の表面振動周波数に及ぼす静磁場印加の影響」
日本金属学会誌, 第75 巻, 第1 号, p.69-74, (2011).
5. K. Morohoshi, M. Uchikoshi, M. Isshiki, H. Fukuyama
“Surface Tension of Liquid Iron as Functions of Oxygen Activity and Temperature”
ISIJ International, 51, 10, p.1580-1586, (2011).
6. S. Ozawa, S. Takahashi, S. Suzuki, H. Sugawara, H. Fukuyama
“Relationship of Surface Tension, Oxygen Partial Pressure, and Temperature for Molten Iron”
Jpn. J. Appl. Phys., 50, p. 11RD05-1-5, (2011).

《密度測定に関する論文》

1. I. Minato, H. Fukuyama, T. Ishikawa, P-F. Paradis, J. Yu, S. Yoda
“Density Measurement of Molten CaF₂ by an Electrostatic Levitator”
Inter. J. Thermophys., 27, 4, p.1173-1180, (2006).
2. M. Watanabe, M. Adachi, T. Morishita, K. Higuchi, H. Kobatake, H. Fukuyama
“Does supercooled liquid Si have a density maximum?”
Faraday Discussions, 136, p.279-286, (2007).
3. M. Adachi, T. Aoyagi, A. Mizuno, M. Watanabe, H. Kobatake, H. Fukuyama
“Precise Density Measurements for Electromagnetically Levitated Liquid Combined with Surface Oscillation Analysis”
Inter. J. Thermophys., 29, p.2006-2014, (2008).

《放射率測定に関する論文》

1. H. Kawamura, H. Fukuyama, M. Watanabe, T. Hibiya
“Normal Spectral Emissivity of Undercooled Liquid Silicon”
Meas. Sci. Technol., 16, p.386-393, (2005).
2. H. Kobatake, H. Khosroabadi, H. Fukuyama
“Normal spectral emissivity of stable and undercooled liquid silicon using electromagnetic levitation in a dc magnetic field”
Meas. Sci. Technol., 22, p.015102-1-7, (2011).

《その他》

1. T. Hibiya, S. Hokama, Y. Koike, M. Rinno, H. Kawamura, H. Fukuyama, K. Higuchi, M. Watanabe
“Surface Oxidation of Electromagnetically Levitated Molten Silicon under a Condition of Oxygen-Super-Saturation”
Scripta Materialia, 54, p.695-699, (2006).
2. H. Fukuyama, T. Yoshimura, H. Yasuda, H. Ota
“Thermal Conductivity Measurements of Liquid Mercury and Gallium by a Transient Hot Wire Method in a Static Magnetic Field”
Inter. J. Thermophys., 27, 6, p.1760-1777, (2006).
3. S. Ueno, H. Kobatake, H. Fukuyama, S. Awaji, H. Nakajima
“Effects of static magnetic field and gas atmosphere on solidification of silicon by electromagnetic levitation”
J. Physics: Conference series, 165, p.012020, (2009).
