The 10th International Symposium on Functional Materials

Aug. 3rd -6th, 2024

Sakura Hall, Tohoku University,
Sendai, Japan

Sponsored by

ABOUT THE ISFM

Advanced materials have been received dramatic increase in their demand in research, development and applications. *The International Symposium on Functional Materials (ISFM)* is held biennial year and attempts to share in the latest innovations, advances and future multidisciplinary research and development in functional materials with primary focus on the connection between fundamental science, engineering applications and commercialization of the materials. The 10th symposium - ISFM 2024- to be held on August 3rd- 6th, 2024 in Sendai, Japan, covers wide-variety topics among advanced materials science and technology, and especially focuses on the **FOUR MAJOR CATEGORIES** including:

- 1. Environmental materials;**
- 2. Electronic Materials;**
- 3. Energy Materials;**
- 4. Biomedical materials.**

CONFERENCE THEMES

The topics include, but not limited to

- Ferroelectric and multiferroic materials
- Ferromagnetic materials
- Energy harvesting and storage materials
- Magneto-optical materials
- Opto-electronic materials
- Shape memory materials
- Thermoelectric materials
- Sensor materials
- Photocatalysis materials
- Luminescent materials
- Nano structures and low-dimensional materials
- Machine Learning, Modeling
& Computation design of functional materials
- Novel applications of functional materials
- Measurement and characterization
- Novel synthesis and processing processes
- Functional thin films
- Biomaterials

CALL FOR ABSTRACT

Authors are invited to submit their abstract via the conference website: ([coming soon](#)) by May 30th 2024. All abstract and manuscript must be submitted in English which is the official language of the conference.

SCHEDULE & DEADLINES

Abstract Submission:	May.1 st -May.31 st , 2024
